FULL STACK SOFTWARE ENGINEER

EXPERIENCE

Event Farm
Senior Software Engineer
Sept 2018 - Present
|
Software Engineer
Feb 2016 - Sept 2018

Test Drove the re-architecture of the API code base, decoupling the codebase from CakePHP 2.x, to a PHP 7 application built using Domain Driven Design based on CQS principles. The project is routed through Lumen and maintains over 85% code coverage.

Authored middleware applications for internal and external projects in languages from Golang to Node.js and PHP, all independently deployable as separate working pieces to consuming our REST API.

Headed the custom integrations between Event Farm and Salesforce, a market leading integration between the two platforms. A PHP interface to the Salesforce Rest API was built for the integrations and has been open sourced and made available on Github.

Created auto generating API Client Libraries (SDK's) for the Event Farm API in PHP, Typescript, Golang + Python. These libraries are dynamically generated by our CI tool, Jenkins.

Digital Canvas Design LLC
Owner, Software Consultant
Jan 2014 - Present
|
Professional Freelancer
Aug 2008 - Dec 2013

Managed web servers and applications for clients, historically built and deployed LAMP/LEMP stacks, currently bouncing between Golang, Node.js + PHP7 depending on the project.

Deployed and secured Linux and BSD servers ranging from firewalls to webservers and NAS machines both internal and external.

Web Services LLC
Full Stack Web Developer
June 2014 - Oct 2015

Led team of 4 developers on SaaS application in an Agile environment. Focusing on Ad Agency's working with Analytics for TV Campaign Spending. Compared TV call-to-actions compared to brand responses.

Developed web applications for local and national news stations to engage the public generating ad revenue at the same time as brand recognition. By scraping government data, we built applications that ranged from Adopt-A-Pet listings to Restaurant Inspections.

Maintained LAMP stacks on CentOS dedicated private server receiving anywhere from 10,000 to 1,000,000 daily requests.

Ace Printing & Graphics
Graphic Designer
May 2011 - Dec 2013

Designed and created graphics for banners, billboards, logos, and websites while communicating with clients to create projects from concept to finished, printed works.
