FULL STACK SOFTWARE ENGINEER

EXPERIENCE

HitRECord
Software Engineer
Apr 2019 - Present

Increased the HitRECord webserver scaling of add compute by 20x, from a previous ~10m to ~30s by updating the deployment of a traditional Ruby on Rails app to a containerized deploy using Kubernetes on AWS EKS, with horizontal node and vertical pod scaling.

Worked on the decoupling of a legacy AngularJS from a Rails monolith, to an Angular 8+ SPA, that is now on upgrade path towards Angular Universal and SSR.

Event Farm
Senior Software Engineer
Sept 2018 - Apr 2019
|
Software Engineer
Feb 2016 - Sept 2018

Test Drove the re-architecture of the API code base, decoupling the codebase from CakePHP 2.x, to a PHP 7 application built using Domain Driven Design based on CQS principles. The project is routed through Laravel and maintains over 85% code coverage.

Authored middleware applications for internal and external projects in languages from Golang to Node.js and PHP, all independently deployable as separate working pieces that would consume our REST API.

Headed the custom integrations between Event Farm and Salesforce, creating a market leading integration between the two platforms. The PHP interface to the Salesforce Rest API we used built for the integrations and has been open sourced and made available on Github.

Created auto generating API Client Libraries (SDK's) for the Event Farm API in PHP, TypeScript, Golang + Python. These libraries are dynamically generated by our CI tool, Jenkins.

Digital Canvas Design LLC
Owner, Software Consultant
Jan 2014 - Present
|
Professional Freelancer
Aug 2008 - Dec 2013

Manages web servers and applications for clients, historically built and deployed LAMP/LEMP stacks, currently bouncing between Golang, Node.js + PHP7 depending on the project.

Constructs sites for clients with varying complexity, from simple static HTML websites, to custom built solutions using PHP + MySQL.

Deploys and secures Linux and BSD servers ranging from firewalls to webservers and NAS machines both internal and external.

Web Services LLC
Full Stack Web Developer
June 2014 - Oct 2015

Led team of 4 developers on SaaS application in an Agile environment. Focusing on Ad Agency's working with Analytics for TV Campaign Spending. Compared TV call-to-actions compared to brand responses.

FULL STACK SOFTWARE ENGINEER

EXPERIENCE (CONT.)

Developed web applications for local and national news stations to engage the public generating ad revenue at the same time as brand recognition. By scraping government data, we built applications that ranged from Adopt-A-Pet listings to Restaurant Inspections.

Maintained LAMP stacks on CentOS dedicated private server receiving anywhere from 10,000 to 1,000,000 daily requests.

Ace Printing & Graphics
Graphic Designer
May 2011 - Dec 2013

Designed and created graphics for banners, billboards, logos, and websites while communicating with clients to create projects from concept to finished, printed works.

Florida Sea Grant
Web Developer
Jan 2012 - July 2012

Coauthored a PHP + jQuery + Google Maps based interactive survey to gather data for two PhD students. The data was used to research community uses of the Sarasota Bay and the Ace Basin.

Student Game Day LLC
Web Developer / Designer
Aug 2008 - Dec 2010

Collaborated on the front-end and design of a custom built web app using embaressingly old-school procedural PHP. A combination of Ticketmaster + Craigslist, for buying + sellinging student college football tickets.

EDUCATION

University of Florida
2013

Bachelors of Fine Arts
Digital Media

SKILLS

Front End
TypeScript, JavaScript, ES6, Unit/Integration Tests, (S)CSS, React, Vue, Angular, React Native, NextJS, SSR, Electron, Webpack. Refactoring.

Back End
Node.js, TypeScript, PHP, Golang, Ruby, Unit Testing, TypeScript, OOP/Functional, MySQL, noSQL, Firebase, OAuth2/JWT, REST, Ruby on Rails, Laravel, Data Mapper. Refactoring.

Ops
Docker, Swarm, K8s/Helm/Flux, Golang, Bash/ZFS, Debian/Ubuntu, ZFS, PFSense, LEMP, Nginx, Load Balancing, SSL, Cron/Queues, SQL.
